Kaytea Moreno Elst
5011 Burns
Detroit, MI 48206

Dear Kaytea Moreno Elst:

Please find this correspondence as a follow-up to the communication you provided on August 20, 2025, to the Detroit Water and Sewerage Department (DWSD) and the Board of Water Commissioners (BOWC) regarding street flooding in the area of Moffat and Seneca (Latham Park).

The site was visited on August 21, 2025, and work began to clean and test 9 basins in the area, under work order #635940. Additionally, there is repair work that needs to be completed under work order #172236, that started on August 23, 2025.

Due to the multiple steps required to assess and repair the catch basin issue, we are projecting the work will be completed no later than September 2, 2025. The permanent restoration to the work area is scheduled to be completed no later than October 30, 2025.

Should you have any further questions or concerns, please do not hesitate to reach out to my office directly at 313-267-3671.

Respectfully,

Gary Watkins
Special Projects Manager
Maintenance and Repair Division

CC: Board of Water Commissioners
