Eugene Lewis Jr.
14515 Alma
Detroit, MI 48205

Dear Eugene Lewis Jr:

Please find this correspondence as a follow-up to the communication you provided on April 16, 2025, to the Detroit Water and Sewerage Department (DWSD) and the Board of Water Commissioners (BOWC) regarding water in the basement and street flooding.

A site visit was conducted on April 8, 2025, to investigate the water in the basement complaint. The Department performed a visual inspection of the sewer behind 14515 Alma and found the sewer was down and flowing normally. A door tag was left to inform you we had visited the site.

The second concern brought to the Board of Water Commissioners was the repeated clogged basins that were causing street flooding. There was a street flooding complaint filed with the department, which was investigated on October 1, 2024. At that time, the basins adjacent to the property had debris in them but were functioning.

DWSD recently received another complaint along with yours regarding a clogged catch basin. The department will dispatch another crew to investigate the clogged catch basin within the next ten days.

Should you have any further questions or concerns, please do not hesitate to reach out to my office directly at 313-267-3671.

Respectfully,

Gary Watkins
Special Projects Manager, Restorations

CC: Board of Water Commissioners
