Customer Service June 2022 Highlights

Presented by:
Matthew Phillips – Chief Customer Service Officer
Kimberly Crowell – Customer Service Manager

DWSD Recognition

Good news! DWSD recognized for Contactless Customer Service.

- **E.Republic and Government Technology** is the nation's only smart media and research company focused exclusively on public-sector innovation for state and local government.
- **Government Technology – National Innovation Showcase**
 - The Districts Awards Program recognizes and shares bright ideas across transit, transportation, libraries, fire districts, parks and recreation, airports, ports and more
 - This category recognizes districts that have utilized tech to improve service delivery to citizens – for example, making physical services available online, deploying new citizen engagement solutions, enhancing user experience, et al.

DWSD Recognition

Good news! DWSD recognized for Contactless Customer Service.

- **Overview:** The Detroit Water and Sewerage Department, which serves nearly 700,000 people in the city of Detroit, upgraded its online customer portal to enable city residents to conduct all water department business online.
- **Impact:** Expansion of online services enabled the department to permanently close three physical service centers that were initially shuttered in 2020 and permanently move all call center staff to remote work.
 - Residents now complete 80% of their service requests online, and as a result, call center and back-office productivity at the department exceeds industry standards.
 - In addition, more than 75% of customers who contact the department via phone resolve their issue with one call — that number was less than 50 percent before the upgrades.
 - And remote work has reduced absenteeism for call center employees by 70%.

In The Flow, Did You Know

Catch Basins – How does it work

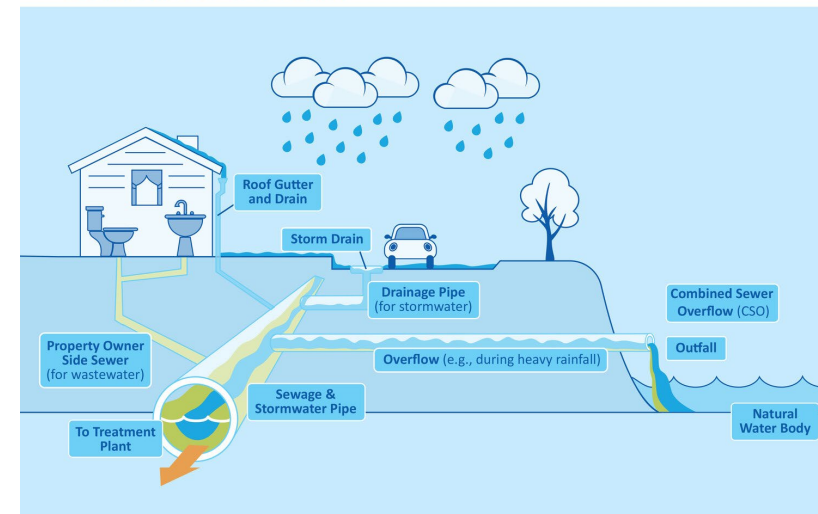

Catch Basins

Catch Basins Move Stormwater from Neighborhoods and Businesses

- Catch basins carry stormwater off city streets and nearby properties into the city's combined sewer system. Detroit has an estimated 95,000 catch basins. This does not include the catch basins on county-owned and state-owned roadways and freeways.
- Catch basin inspection and cleaning is part of a comprehensive effort by DWSD to improve preventative maintenance for the combined sewer system. Clogged or broken catch basins largely cause street flooding which may lead into yards.
- **Blocked catch basins do not cause basement flooding, that is mostly caused by an issue with the private sewer line, such as tree roots clogging the pipe.**
