

Water Bill Comparison*

*Some communities calculate how they charge for sewerage and stormwater services differently (e.g., flat fee versus acreage rate for stormwater), therefore the total bill comparison is not apples-to-apples. However, the water portion of the bill is an authentic comparison, because each community has a usage charge and a fixed meter charge. Comparison is based on FY2018-19 rates for five units of water per month (one unit is 748 gallons).

**The City of Warren operates its own wastewater treatment plant and does not receive those services from the Great Lakes Water Authority.

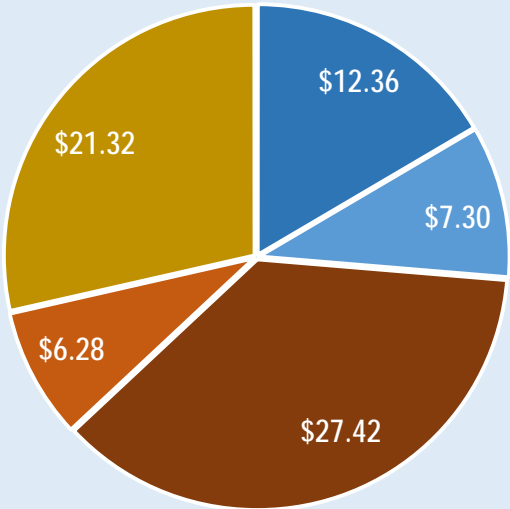

Detroit Water Bill*

Median Monthly Bill for
Detroit Residential Customer
as of July 2018:

\$74.68

- Water Usage
- Water Service Charge
- Sewerage Disposal
- Sewerage Service Charge
- Drainage Charge

*Based on 5 units of water (748 gallons per unit) for an average family of three members using a 5/8-inch meter and 0.05 impervious acreage.
