### **MOTION**

Upon recommendation of Mamata Burgi, Procurement Manager, the Board of Water Commissioners for the City of Detroit, Water and Sewerage Department, authorizes the Director to approve DWSD Contract 6002986 for Project WS-715 with Lakeshore Global Corporation, for Water Improvements for McNichols Evergreen, Miller Grove, Minock Park, Riverdale, Rosedale Park for a total amount not-to-exceed \$9,682,978.08 and a term of 2 years. This also authorizes the Director to take such other action as

may be necessary to accomplish the intent of this vote.

# **BACKGROUND / JUSTIFICATION**

DWSD Project No. WS-715 is part of an ongoing distribution piping system water main replacement program. The work consists of replacing existing 8-inch diameter water mains at selected locations in Detroit that have a history of frequent breaks and high maintenance cost. Lead services forecasted for replacement are 385 and represents 6.5% of the contractor's bid. The aggregate forecasted length of Lead services being replaced with copper within the public ROW is 10,741 linear feet and 9,785 linear feet on private properties. Additionally, Lead services of one inch and less in diameter are replaced with one-inch copper tube; existing Lead services of 1.5-inches and 2-inches diameter are replaced with copper tube of the same diameter.

This water main replacement contract is one of a continuing series of contracts that replaces or lines the aged water mains in the City of Detroit having an extensive history of leaks and breaks that have also exceeded their intended service life. The new water mains and associated infrastructure will enhance the integrity of DWSD's Water System and ensure quality service to its customers. To protect the health and safety of our customers, existing Lead (Pb) water services are being replaced with copper in both the right-of-way and from the curb box to the customer water meter.

Proposed Contract 6002986, for Project WS-715, will continue the rehabilitation of water main to provide better services to citizens of Detroit and meet the needs of future City Development.

#### PROJECT OBJECTIVES / COSTS

The objective of the proposed Project WS-715 is to replace existing 8-inch water mains that have a history of leaks and breaks with approximately 25,586 linear feet of 8-inch water main, including 4,390 linear feet of 8-inch lining, 5,956 linear feet of horizontal directional drilling (HDD), and 8,473 linear feet of pipe bursting. Also, whether the pipe is new DI pipe or HDPE pipe, the work includes replacement of all fittings, valves, and hydrants. Finally, existing Lead water services will be replaced with copper from the water main to the customer meter. The number of Lead services forecasted for replacement through this project is 385 and the Lead water service replacement work represents 6.5% of the contractor's bid. The aggregate forecasted length of Lead services being replaced with copper within the public ROW is 10,741 linear feet and 9,785 linear feet on private properties. Should additional Lead services be encountered over the course of the work, they shall also be replaced at the rates established in the Bid Schedule.
